

Plastic predicament examples

3 REASONS PLASTIC STRAWS SUCK...

1 They harm marine wildlife & ecosystems

2 They expose us to unhealthy toxic chemicals

3 Used for minutes, here for centuries, piling up daily

3 WAYS TO STOP SUCKING PLASTIC

1 Skip the straw & sip your drink

2 Switch to reusable steel, glass or bamboo straws

3 Use paper straws instead*

#NoPlasticStraws #StrawsSuck

* Compostable or biodegradable plastics do not break down safely in ocean conditions

LESS PLASTIC.

Last straw

Plastic is a thing that we don't even really need
I got a problem with it 'cause it causes death at rapid speed
And I know we used to use it, but I think it's time to lose it
'Cause the damage that it's causing to the Earth is so abusive
Have you ever used a plastic bottle, where'd it go?
Only 9% of plastic in America's recycled
Let me teach you about waste without wasting my breath
In honor of the animals without any left
Millions of them die every single year
'Cause they choked on something long, thin and clear
And the straw that you left in a mess on your desk
Ended up on a beach in a seagull's chest
And let's not forget the environment
By the year 2050 scientists predict
The ocean will contain more plastic than fish
And that's really not something I would wish

Witness this damage, why do it?
Destroy this planet, why do it?
Witness this damage, why do it?
This is the last straw
Bright Fight one and all, ooh
We got to fight
I got a bright idea
I got a fight in Me-Ya, ooh
We've gone too far
Let us destroy, destroy no more
