

Pick one of these products:

1. Research how it is used, how often and why.
2. Research and find a more eco-friendly sustainable product that could replace this single use plastic. If you can't find a more sustainable product then invent your own!
3. (Time away from screen) Find a way to persuade others around you to use your more sustainable- eco-friendly product. Examples of what you could do are on the weekly timetable.

Examples of single use plastics!
